Subject: . . . and justice for all

Since when is justice served by punishing the person/company who can do it better? This "lowering of the bar" makes as much sense as flying in an airplane let out to the lowest bidder. If all those self-serving competitors of Microsoft want more business let them invent it, develop it, prove it, manufacture it, and provide it to the market. Right now, the multitude is so pleased with Microsoft's efforts that they wait in line to buy and mark their calendars with proposed release dates for the latest "good stuff" from Microsoft.

Get with the program!!!
